

The **SpaceVac MERCURY.2** is a powerful heavy duty vacuum unit designed and precision engineered for use with SpaceVac's Classic, Pro and Ultra systems to remove commercial dirt and dust internally.

Handbuilt to our exacting specifications in Italy, the machine features a two stage motor to provide powerful suction to remove built up dust and other debris from high-level areas.

The **MERCURY.2** has been designed to provide superior suction, water lift and airflow to other vacuums available elsewhere on the market to provide the astounding performance in a robust, durable package.

Further, the vacuums portable profile and low operating volume, means it can be easily deployed with minimal disruption to the surrounding environment and reduced operational downtime making it the ideal solution for light commercial and domestic cleaning such as homes, offices and schools.

In designing our own line of high-quality vacuums, SpaceVac has created the perfect partner to our innovative new high-level cleaning systems.

Put SpaceVac to the test today - Book a demo\* with your local representative and find out how you could be working higher, safer and faster with SpaceVac.

**SpaceVac: Innovation not Imitation.**

## Technical Specifications:

	S.I	Mercury.2 XP5110.2 WD
No of motors		2
Voltage / Frequency	V / Hz	220/240 50/60
Number of motor stages		2
Motor power rating	W	1000
Type of Vacuum		Wet / Dry
Air Flow Rate	m <sup>3</sup> /h	104
Water Suction	kPa	2100:21
Capacity of Collection Tank	l	110
Length of power cable	m	10
Weight of appliance	cm	23
Sound pressure level	dB [A]	72
Dimensions	cm	51 x 66 x 95

\* Where available  
\*\* Note - markings on Vacuum show, may differ from final product received.
